

In the Claims:

Please amend Claim 1 as follows:

1. (currently amended) A document holder for holding one or more sheets of paper comprising:  
  
a front, generally flat, elongated rectangular cover and a back, generally flat, elongated rectangular cover, said covers being formed of a single sheet of material and joined together by only a portion of said material adjacent one corner of said front and back covers, said covers being adapted to substantially enclose the one or more sheets of paper therebetween and  
  
a substantially triangularly shaped clip pivotably mounted to both of said front and back covers adjacent said corner, said clip being pivotable from an operative position wherein the papers are held between said covers by said clip and an inoperative position wherein the papers may be released from said clip, said clip covering said portion of said material when in said operative position.
2. (currently amended) The document holder of Claim 1 wherein said front and back covers are diagonally scored adjacent said corner to allow said covers to open and lie flat.
3. (original) The document holder of Claim 1 wherein said covers are transparent.
4. (original) The document holder of Claim 1 wherein said covers are translucent.

In view of the foregoing, Applicant submits that the amendment document filed on September 27, 2004 has now been corrected and is in compliance with 37 C.F.R. §1.121.

Respectfully submitted,

JOSHUA K. OWEN
